Table of contents

EDITORIAL REVIEW

Anemia of end-stage renal disease (ESRD). *Joseph W. Eschbach and John W. Adamson* 1

LABORATORY INVESTIGATION

Proton NMR spectroscopy of rabbit renal cortex. *Zoltán H. Endre and Philip W. Kuchel* 6

Evidence for a role of PTH in the reduced pressor response to norepinephrine in chronic renal failure. *Kunitoshi Iseki, Shaul G. Massry, and Vito M. Campese* 11

The mechanism of dextrose-enhanced peritoneal mass transport rates. *John F. Maher, Robin R. Bennett, P. Hirszel, and Eva Chakrabarti* 16

Low-protein diet prevents glomerular damage in adriamycin-treated rats. *Giuseppe Remuzzi, Carla Zoja, Andrea Remuzzi, Magda Rossini, Cristina Battaglia, Massimo Broggini, and Tullio Bertani* 21

Effect of leukocyte depletion on glomerular dynamics during acute glomerular immune injury. *Bryan J. Tucker, Leslie C. Gushwa, Curtis B. Wilson, and Roland C. Blantz* 28

Subcellular localization of renal kallikrein by ultrastructural immunocytochemistry. *Carlos P. Vío and Carlos D. Figueroa* 36

Intrarenal prostaglandin release: Effects of arachidonic acid and hyperchloremia. *Christopher S. Wilcox, Shirley Roddis, W. Stanley Peart, David Gordon, and Graham P. Lewis* 43

Effects of in vitro aldosterone on the rabbit cortical collecting tubule. *Charles S. Wingo, Juha P. Kokko, and Harry R. Jacobson* 51

CLINICAL INVESTIGATION

Transmission electron microscopy of urinary sediment in human acute renal failure. *Anil K. Mandal, Allan H. Sklar, and James B. Hudson* 58

Regional cerebral blood flow in dialysis encephalopathy and primary degenerative dementia. *Roy J. Mathew, Pauline Rabin, William J. Stone, and William H. Wilson* 64

Acute worsening of renal function during episodes of macroscopic hematuria in IgA nephropathy. *Manuel Praga, Victor Gutierrez-Millet, José J. Navas, Luis M. Ruilope, José M. Morales, José M. Alcazar, Ignacio Bello, and José L. Rodicio* 69

Kallikrein excretion in renal transplant recipients and in uninephrectomized donors. *Jocelyn Spragg, Donald L. Denney, Nicholas L. Tilney, and K. Frank Austen* 75

TECHNICAL NOTE

Capillary gas chromatography measurement of oxalate in plasma and urine. *Michelle Lopez, Mendel Tuchman, and Jon I. Scheinman* 82

NEPHROLOGY FORUM

The pathogenetic spectrum of Bartter's syndrome. *Jay H. Stein* 85

EDITORIAL REVIEW

Acquired cystic disease: Replacing one kidney disease with another. *Jared J. Grantham and Errol Levine* 99

LABORATORY INVESTIGATION

Increased nephrotoxicity of gentamicin in pyelonephritic rats. *Denis Beauchamp, André Poirier, and Michel G. Bergeron* 106

Branched-chain amino acid aminotransferase along the rabbit and rat nephron. *Helen B. Burch, Natalie Cambon, and Oliver H. Lowry* 114

Captopril enhances aminoglycoside nephrotoxicity in potassium-depleted rats. *Paul E. Klotman, James E. Boatman, Bryan D. Volpp, James D. Baker, and William E. Yarger* 118

Nephron responses to converting enzyme inhibition in non-clipped kidney of Goldblatt hypertensive rat at normotensive pressures. *Wann-Chu Huang, Cynthia A. Jackson, and L. Gabriel Navar* 128

Nephrotoxic serum nephritis with hypertension: Amelioration by antihypertensive therapy. *Joel Neugarten, Bernard Kaminetsky, Helen Feiner, Robert G. Schacht, David T. Liu, and David S. Baldwin* 135

Renal hemodynamics and glomerular morphology in repetitively pregnant aging rats. *Christine Baylis and Helmut G. Rennke* 140

Preferential transport of non-enzymatically glucosylated ferritin across the kidney glomerulus. *Stuart K. Williams and Robert K. Siegel* 146

CLINICAL INVESTIGATION

Beta 2-microglobulin clearance in neonates: Index of tubular maturation. *Farahnak K. Assadi, Eunice G. John, Parvin Justice, and Linda Fornell* 153

Hemodialysis membrane-induced activation of phagocyte oxidative metabolism detected in vivo and in vitro within microamounts of whole blood. *Anh Thu Nguyen, Claire Lethias, Johanna Zingraff, André Herbelin, Catherine Naret, and Béatrice Descamps-Latscha* 158

Electrical charge of serum and urinary albumin in normal and diabetic humans. *Gian Marco Ghiggeri, Giovanni Candiano, Gerolamo Delfino, and Carlo Queirolo* 168

Post-transplant acute renal failure in cadaver renal recipients treated with cyclosporine. *Bruce M. Hall, David J. Tiller, Geoffrey G. Duggin, John S. Horvath, Annabelle Farnsworth, James May, James R. Johnson, and A. G. Ross Sheil* 178

Acid-base homeostasis during chronic PTH excess in humans. *Henry N. Hulter and John C. Peterson* 187

Association of HLA-DRw8 and DQw3 with minimal change nephrotic syndrome in Japanese adults. *Yutaka Kobayashi, Xiang-Mei Chen, Yoshiwuki Hiki, Kazufumi Fujii, and Noboru Kashiwagi* 193

Continuous ambulatory peritoneal dialysis in the United States: A three-year study. *Karl D. Nolph, Sidney J. Cutler, Seth M. Steinberg, and Joel W. Novak* 198

Interrelationship between cardiac output and vascular resistance as determinants of effective arterial blood volume in cirrhotic patients. *Michael D. Shapiro, Kathleen M. Nicholls, Bertron M. Groves, Rudiger Kluge, Hsaio-Min Chung, Daniel G. Bichet, and Robert W. Schrier* 206

NEPHROLOGY FORUM

Lead nephropathy. *William L. Bennett* 212

Table of contents

EDITORIAL REVIEW

Hypercoagulability, renal vein thrombosis, and other thrombotic complications of nephrotic syndrome. *Francisco Llach* 429

LABORATORY INVESTIGATION

Decreased total and active urinary kallikrein in normotensive Dahl salt susceptible rats. *Leonard A. Arbeit and Susan R. Serra* 440

Sodium-potassium ATPase activity mediates cyst formation in metanephric organ culture. *Ellis D. Avner, William E. Sweeney, Jr., David N. Finegold, Nicholas P. Piesco, and Demetrius Ellis* 447

Selective ADH-induced hypertrophy of the medullary thick ascending limb in Brattleboro rats. *Nadine Bouby, Lise Bankir, Marie-Marcelle Trinh-Trang-Tan, Will M. Minuth, and Wilhelm Kriz* 456

Glomerular sieving of anionic and neutral bovine albumins in proteinuric rats. *John A. Bertolatus and Lawrence G. Hunsicker* 467

Tubular action of diuretics: Distal effects on electrolyte transport and acidification. *Max Hropot, Nicole Fowler, Bertil Karlmark, and Gerhard Giebisch* 477

Specific defects in insulin-mediated muscle metabolism in acute uremia. *Robert C. May, Andrew S. Clark, M. Anwar Goheer, and William E. Mitch* 490

Glycoprotein reutilization in regenerating microvilli after renal ischemia in rats. *Jean K. Paddock, Arthur R. Taddeo, John P. Paddock, and Leah M. Lowenstein* 498

Pathophysiology of the kidney in rats with Heymann nephritis. *Marianna J. Zamlauski-Tucker, Judith B. Van Liew, and Bernice Noble* 504

CLINICAL INVESTIGATION

The detection of monocytes in human glomerulonephritis. *Franco Ferrario, Aldo Castiglione, Guiliano Colasanti, Giovanni Barbiano di Belgioioso, Silvio Bertoli, and Giuseppi D'Amico, with technical assistance from Stefania Nava* 513

Proteinuria, hematuria, and leukocyturia in children with mixed urinary and intestinal schistosomiasis. *Ekkehard Doehring, Jochen H.H. Ehrich, Udo Vester, Hermann Feldmeier, Ulrich Poggensee, and Johannes Brodehl* 520

A mechanistic analysis of the National Cooperative Dialysis Study (NCDS). *Frank A. Gotch and John A. Sargent* 526

Effects of acetate and bicarbonate dialysate in stable chronic dialysis patients. *Raymond M. Hakim, Mary-Anne Pontzer, Denise Tilton, J. Michael Lazarus, and Michael N. Gottlieb* 535

Protective adaptation of low serum triiodothyronine in patients with chronic renal failure. *Victoria S. Lim, Michael J. Flanigan, Donald C. Zavala, and Richard M. Freeman* 541

Interstitial nephritis associated with cytomegalovirus infection. *Jeffrey L. Platt, Richard K. Sibley, and Alfred F. Michael* 550

Interleukin 2 production by peripheral blood lymphocytes in allograft patients during acute rejection episodes. *Henri Vie, Marc Bonneville, Roger Cariou, Jean François Moreau, and Jean Paul Soulillou* 553

Detection of plasma proteins during sequential ultrafiltration/dialysis. *Zofia Wichman, Władysław Pajdak, Olgierd Smoleński, and Jerzy Kopeć* 558

Contents continued on next page.

Contents continued

TECHNICAL NOTE

Quantitative assessment of procoagulant activity in isolated rat glomeruli. *Dominique de Prost and Alain Kanfer, with the technical assistance of Véronique Le Floch* 566

NEPHROLOGY FORUM

Mechanisms of glomerular injury in immune-complex disease. *William G. Couser* 569

EDITORIAL REVIEW

Relevance of animal models to analgesic-associated renal papillary necrosis in humans. *Peter H. Bach and T.L. Hardy* 605

LABORATORY INVESTIGATION

Long-term effects of 24-hr unilateral ureteral obstruction on renal function in the rat. *Steven J. Bander, John E. Buerkert, Daniel Martin, and Saulo Klahr* 614

Effect of potassium depletion on two-kidney, one-clip renovascular hypertension in the rat. *Robert G. Benedetti and Stuart L. Linas* 621

Role of prostaglandins and angiotensin II in experimental glomerulonephritis. *Kazoh Kaizu, Donald Marsh, Robert Zipser, and Richard J. Glassock* 629

Bladder secretion of inhibitors of calcium oxalate crystal growth. *Xavier Martin, Terry J. Opgenorth, Peter G. Werness, Robert T. Rundquist, J. Carlos Romero, and Lynwood H. Smith* 636

Mineralocorticoid effect on K+ permeability of the rabbit cortical collecting tubule. *John B. Stokes, with the technical assistance of Ivan Lee* 640

CLINICAL INVESTIGATION

B and T cell abnormalities in patients with primary IgA nephropathy. *Leonardo Cagnoli, Elisabetta Beltrandi, Sonia Pasquali, Renato Biagi, Mario Casadei-Maldini, Leonella Rossi, and Pietro Zucchelli* 646

Preservation of blood volume during edema removal in nephrotic subjects. *Anton B. Geers, Hendrik A. Koomans, Jan C. Roos, and Evert T. Dourhout Mees* 652

Blood sodium-blood volume state, aldosterone, and cardiovascular responsiveness after calcium entry blockade with nifedipine. *Claudio Marone, Sergio Luisoli, Fulvio Bomio, Carlo Beretta-Piccoli, Mario G. Bianchetti, and Peter Weidmann* 658

Charge and size of mesangial IgA in IgA nephropathy. *Renato C. Monteiro, Lise Halbwachs-Mecarelli, Maria Cristina Roque-Barreira, Laure-Hélène Noel, Jean Berger, and Phillipe Lesavre* 666

Persistence of antibodies to pneumococcal vaccine in patients with chronic renal failure. *Jukka Nikoskelainen, Markku Koskela, Jorma Forsström, Antero Kasanen, and Maija Leinonen* 672

NEPHROLOGY FORUM

Acid-base balance in dialysis patients. *F. John Gennari* 678

EDITORIAL REVIEW

Virulence of urinary pathogens. *Michael J. Harber and A. William Asscher* 717

LABORATORY INVESTIGATION

Effect of parathyroid hormone on energy metabolism of skeletal muscle. *Ryszard Baczynski, Shaul G. Massry, Maria Magott, Sami El-Belbessi, Ricardo Kohan, and Nachman Brautbar* ... 722

Cyclic AMP-calcium interaction in the transmission of tubuloglomerular feedback signals. *P. Darwin Bell* 728

Functional basis for the glomerular alterations in uranyl nitrate acute renal failure. *Roland C. Blantz, Juan C. Pelayo, Leslie C. Gushwa, Robert R. Myers, and Andrew P. Evan* 733

Tubular basement membrane changes in 2-amino-4,5-diphenylthiazole-induced polycystic disease. *Ralph J. Butkowski, Frank A. Carone, Jared J. Grantham, and Billy G. Hudson* 744

Microvascular reactivity of in vitro blood perfusued juxtamedullary nephrons from rats. *Daniel Casellas, Pamela K. Carmines, and L. Gabriel Navar* 752

Net tubular secretion of bicarbonate by the alligator kidney. Antimammalian response to acetazolamide. *Guy Lemieux, James Berkofsky, Andrée Quenneville, and Christiane Lemieux* .. 760

Effect of cyclosporine administration on renal hemodynamics in conscious rats. *Brian M. Murray, Mark S. Paller, and Thomas F. Ferris* 767

Myocardial hypertrophy in rats with renal insufficiency. *Michael Rambausek, Eberhard Ritz, Gerhard Mall, Otto Mehls, and Hugo Katus* 775

CLINICAL INVESTIGATION

Bone GLA protein in predialysis chronic renal failure. Effects of $1,25(OH)_2D_3$ administration in a long-term follow-up. *Giorgio Coen, Sandro Mazzaferro, Ermanno Bonucci, Franco Taggi, Paola Ballanti, Anna R. Bianchi, Giuseppe Donato, Carlo Massimetti, Antonella Smacchi, and Giulio A. Cinotti* 783

Plasma levels of granulocyte elastase during hemodialysis: Effects of different dialyzer membranes. *Walter H. Hörl, Hjalmar B. Steinhauer, and Peter Schollmeyer* 791

Lack of correlation of P blood group phenotype and renal scarring. *Stefan H. Jacobson, Lars-Eric Lins, Stefan B. Svenson, and Gunilla Källenius* 797

Hyperkalemic renal tubular acidosis: Effect of furosemide in humans and in rats. *Shiva Rastogi, John M. Bayliss, Luiz Nascimento, and Jose A.L. Arruda* 801

Effect of dialysis and ultrafiltration on osmolality, colloid osmotic pressure, and vascular refilling rate. *Mariano Rodriguez, James A. Pederson, and Francisco Llach* 808

Norepinephrine-related mechanism in hypertension accompanying renal failure. *Dominique Schohn, Peter Weidmann, Henri Jahn, and Carlo Beretta-Piccoli* 814

Low molecular weight heparin in hemodialysis and hemofiltration patients. *Joachim Schrader, Rainer Valentin, Hans-Joachim Tönnis, Udo Hildebrand, Werner Stibbe, Victor W. Armstrong, Michael Kandt, Heinz Köstering, Eduard Quellhorst, and Fritz Scheller* 823

Limitations of creatinine as a filtration marker in glomerulopathic patients. *Ovadia Shemesh, Helen Golbetz, Joseph P. Kriss, and Bryan D. Myers* 830

Liver disease in recipients of long-functioning renal allografts. *Matthew R. Weir, Robert L. Kirkman, Terry B. Strom, and Nicholas L. Tilney* 839

Contents continued on next page

NEPHROLOGY FORUM

The cellular renal response to respiratory acid-base disorders. *QaisAl-Awqati* 845

EDITORIAL REVIEW

Complement and the direct mediation of immune glomerular injury: A new perspective. *William G. Couser, Patricia J. Baker, and Stephen Adler* 879

LABORATORY INVESTIGATION

Hemodynamic effects of enalapril on neonatal chronic partial ureteral obstruction. *Robert L. Chevalier and Michael J. Peach, with the technical assistance of Anthony V. Broccoli* 891

Monoclonal antibody to Na,K–ATPase: Immunocytochemical localization along nephron segments. *Michael Kashgarian, Daniel Biemesderfer, Michael Caplan, and Bliss Forbush, III* .. 899

Studies on the pathogenesis of cisplatin-induced hypomagnesemia in rats. *Viroon Mavichak, Norman L. M. Wong, Gary A. Quamme, Alexander B. Magil, Roger A. L. Sutton, and John H. Dirks* 914

Reactivation of latent murine cytomegalovirus from kidney. *Kevin R. Porter, Diane M. Starnes, and John D. Hamilton* 922

Ultrafiltration coefficient of isolated glomeruli of rats aged 4 days to maturation. *Virginia J. Savin, Cheryl Beason-Griffin, and Walter P. Richardson* 926

CLINICAL INVESTIGATION

Effect of inorganic phosphate on serum ionized calcium concentration in vitro: A reassessment of the "trade-off hypothesis." *Andrew J. Adler, Nereida Ferran, and Geoffrey M. Berlyne* 932

Formaldehyde kinetics and bacteriology in dialyzers. *Raymond M. Hakim, Richard A. Friedrich, and Edmund G. Lowrie with the technical assistance of Joanne M. Mantilla and Catherine Lee* 936

Low incidence of IgA nephropathy in Blacks. *J. Charles Jennette, Sherri D. Wall, and Alice S. Wilkman* 944

Hyrdochlorothiazide inhibits bone resorption in men despite experimentally elevated serum 1,25-dihydroxyvitamin D concentrations. *Jacob Lemann, Jr., Richard W. Gray, William J. Maierhofer, and Herman S. Cheung* 951

Chronic hepatitis in end-stage renal disease: Comparison of HBsAg-negative and HBsAG-positive patients. *Patrick S. Parfrey, Dominique Farge, R. D. Clarke Forbes, Raymond Dandavino, Scott Kenick, and Ronald G. Guttmann* 959

Focal segmental glomerular sclerosis: The cellular lesion. *Melvin M. Schwartz and Edmund J. Lewis* 968

The role of urinary kininogen in the regulation of kinin generation. *Marc S. Weinberg, Peter Azar, Wayne M. Trebbin, and Richard J. Solomon* 975

TECHNICAL NOTES

Application of cold flush preservation to in vitro microperfusion studies of kidney tubules. *Susan C. Pirie and David J. Potts* 982

Determination of urinary citrate by high performance ion chromatography. *Raj P. Singh and G. H. Nancollas* 985

NEPHROLOGY FORUM

Diuretic-induced hypokalemia. *Richard L. Tannen* 988

Volume 28, Supplement 17

IVth Capri Conference on
Uremia
Capri, Italy, September 1983

Table of contents

Introduction. *Carmelo Giordano and Eli A. Friedman* S-1
Uremia is an intoxication. *Jonas Bergström* S-2
Neurotoxicity of parathyroid hormone in uremia. *Shaul G. Massry* S-5
Quality hemodialysis: A "gold standard" treatment for survival. *A. Peter Lundin* S-12
For children, renal transplantation is the only realistic choice. *Richard N. Fine* S-15
Clinical comparison in hemodialysis and hemofiltration. *Allan J. Collins, Prakash Keshaviah, Karen M. Ilstrup, Fred Shapiro* S-18
Continuous ambulatory peritoneal dialysis best treatment for end-stage renal failure. *Jack Moncreif and Robert Popovich* S-23
CCPD is even better than CAPD. *José Diaz-Buxo* S-26
The need for dialysis. *Antonio Vercellone and Giuseppe Paolo Segoloni* S-29
Protecting the patient's interest. *Thomas E. Starzl* S-31
Bias in selecting treatment for end-stage renal disease. *George A. Porter, Lorabeth Lawson, and James Buss* S-34
Physician bias in uremia therapy. *Eli A. Friedman* S-38
Outcome of long-term hemofiltration. *Conrad A. Baldamus and Eduard Quellhorst* S-41
Hemoperfusion in the treatment of uremia. *Hans J. Gurland* S-47
Combining hemodialysis and peritoneal dialysis. *Umberto Buoncristiani* S-50
Optimized patient care demands flexibility in choosing therapy. *Vincenzo Cambi and Giovanni Garini* S-54
Benefits of early initiation of dialysis. *Vittorio Bonomini, Carlo Feletti, Maria P. Scolari, and Sergio Stefoni* S-57
Intervention in nephropathy due to insulin-dependent diabetes mellitus (IDDM). *Robert L. Stephen, J. Gary Maxwell, Jeffrey J. Harro, Stephen C. Jacobson, Barry K. Hanover* S-60
Early dietary protein restriction protects the failing kidney. *Carmelo Giordano* S-66
Is phosphate more important than protein in low-protein diets? *Guiseppe Maschio* S-71
The importance of early treatment of renal bone disease in children. *Russell W. Chesney, Shermine Dabbagh, David T. Uehling, Hector F. DeLuca* S-75
Is amino acid imbalance harmful to patients in chronic renal failure? *Alberto Tizianello, Giovanni Deferrari, Giacomo Garibotto, Czistina Robaudo, Alberto Canepa, Giancarlo Passerone* S-79
Should hyperlipemia of renal failure be treated? *Eberhard Ritz, Jan Augustin, Jurgen Bommer, Agostino Gnasso, Werner Hoberbosh* S-84
Is glucose intolerance harmful for the uremic patient? *Ralph A. De Fronzo and J. Douglas Smith* . S-88
The effect of branch chain amino acids on proliferation of normal and uremic cells. *Renato Esposito, Hervé Betuel, Massimo Manzo, Dominico Cirillo, Maria Pluvio, Ann C. Fredel, Norina Lanzetti, Nicola Perna, Carmelo Giordano* S-98
Predialysis BUN and creatinine do not predict adequate dialysis, clinical rehabilitation, or longevity. *Morrel M. Avram, Paul A. Slater, Amado Gan, Michael Iancu, Abrahm N. Pahilan, David Okanya, Kay Rajpal, Son S. Paik, Mohammed Zouabi and Paul A. Fein* S-100
Standardization of hemodialysis materials. *Giuseppe D'Amico and Enrico Petrella* S-105

Contents continued on next page

Contents continued

Minimal laboratory monitoring of uremic patients. *Diego Brancaccio, Alberto Minetti, Enrico Sabbioni, Romano Pietra, Orso Bugiani, Giovanna Como, and Maurizio Gallien* S-108
Standardization of CAPD in adults and children. *Giuseppe Capodiacasa, Natale G. De Santo, Francesco Vaccaro, Giovanbattista Capasso, and Carmelo Giordano* S-112
Minimal standards for hemofiltration. *Luigi Minetti, Giovanni Civati, Carlo Guastoni, Angelo Perego, and Ugo Teatini* S-116
Defensive medicine in diabetic nephropathy. *Eli A. Friedman* S-120
Are standards and checklists needed in uremia therapy? *Stanley Shaldon and Karl M. Koch* S-124
Hemoperfusion for uremia: Past, present, and future. *James F. Winchester and Stephen R. Ash* .. S-127
Plasmapheresis holds distinct advantages for 21st century uremia therapy. *Yukihiko Nose, James W. Smith, and Paul S. Malchesky* S-131
Uremia therapy: The resource allocation dilemma from a global perspective. *Nancy Boucot Cummings* S-133
Natural history and treatment of primary (idiopathic) proliferative glomerulonephritis: A review. *Richard J. Glassock* S-136
New trends in hepatorenal syndrome. *Pasquale Coratelli, Giuseppe Passavanti, Irene Munno, Donato Fumarola, and Alberto Amerio* S-143
Outcome of children with acute renal failure. *Patrick Niaudet, Maher Haj-Ibrahim, Marie-France Gagnadoux, and Michel Broyer* S-148
When should renal biopsy be done in acute uremia? Tomorrow could be too late. *Gabriel Richet* . S-152
Diuretic therapy in uremic patients. *Antonio Dal Canton, Domenico Russo, Riccardo Gallo, Gianfranco Ardillo, Sergio Trevico, Bruno Cianciaruso, and Vittorio Andreucci* S-154
The upper and lower gastrointestinal tract in uremic patients on long-term hemodialysis. *Giovanni Milito, Massimo Taccone-Gallucci, Caterina Brancaleone, Francesco Nardi, Daniel Cesca, Vittorio Boffo, and Carlo Umberto Casciani* S-157
Temperature monitoring in dialysis-induced hypotension. *Giorgio Bazzato, Ugo Coli, Silvano Landini, Sandro Lucatello, Agostino Fracasso, Paolo Morachiello, Flavio Righetto, and Flavio Scanferla* S-161
Thyroid function in uremic children. *Natale G. De Santo, Carlo Carella, Ernst Leumann, Gianni Amato, Shanty Fine, Francesca Nuzzi, Giovanbattista Capasso, Guisseppe Capodicasa, Giuliana Lama, Vito A. Di Leo, and Carmelo Giordano* S-166
Pitfalls in tissue typing for kidney transplantation. *Hervé Betuel, Lucetti Gebuhrer, and Jules Traeger* S-170
Silicon metabolism: The basic facts in renal failure. *Geoffry M. Berlyne, Edward Dudek, Andrew J. Adler, Jack E. Rubin, and Michael Seidman* S-175
A new ion exchanger with high in vivo sodium capacity. *Norbert S. Mason, Robert E. Sparks, Hillel Skoff, Herbert Lubowitz, Guner B. Gulmen, Debesh C. Mazumdar, and Morton H. Litt* .. S-178
Aluminium and renal osteodystrophy in chronic uremia. *Yvone Berland, Mizelle Grandvuillemin, Sam Charhon, Michel Olmer, with the technical assistance of Christian Andonian* S-183
Benefits from bicarbonate dialysis. *Francesco Mastrangelo, Salvatore Rizzelli, Cosimo Corliano, Anna Maria Montinary, Vicenzo De Blasi, Luigi Alfonso, Maria Aprile, Marcello Napoli, and Rosalia Laforgia* S-188
